Standard precautions

Standard precautions must always be used when caring for all patients, regardless of their infection status

Perform hand hygiene

Clean and reprocess reusable patient equipment

Use personal protective equipment (PPE)*

Perform routine environmental cleaning

Use respiratory hygiene and cough etiquette

Handle and store waste safely

Use aseptic technique

Handle and store linen safely

Use and dispose of sharps safely

*When used as part of **standard precautions**, PPE protects against probable exposure to blood and body substances. When used as part of **transmission-based precautions**, PPE serves as a barrier to specific means of transmission of infectious agents.
