

Standard precautions

Standard precautions must **always** be used when caring for all patients, regardless of their infection status

Perform hand hygiene

Clean and reprocess reusable patient equipment

Use personal protective equipment (PPE)*

Perform routine environmental cleaning

Use respiratory hygiene and cough etiquette

Handle and store waste safely

Use aseptic technique

Handle and store linen safely

Use and dispose of sharps safely

*When used as part of **standard precautions**, PPE protects against probable exposure to blood and body substances. When used as part of **transmission-based precautions**, PPE serves as a barrier to specific means of transmission of infectious agents.
