

## On the Radar

Issue 661

12 August 2024

*On the Radar* is a summary of some of the recent publications in the areas of safety and quality in health care. Inclusion in this document is not an endorsement or recommendation of any publication or provider. Access to particular documents may depend on whether they are Open Access or not, and/or your individual or institutional access to subscription sites/services. Material that may require subscription is included as it is considered relevant.

*On the Radar* is available online, via email or as a PDF or Word document from <https://www.safetyandquality.gov.au/newsroom/subscribe-news/radar>

If you would like to receive *On the Radar* via email, you can subscribe on our website <https://www.safetyandquality.gov.au/newsroom/subscribe-news> or by emailing us at [mail@safetyandquality.gov.au](mailto:mail@safetyandquality.gov.au). You can also send feedback and comments to [mail@safetyandquality.gov.au](mailto:mail@safetyandquality.gov.au).

For information about the Commission and its programs and publications, please visit <https://www.safetyandquality.gov.au>

### On the Radar

Editor: Dr Niall Johnson [niall.johnson@safetyandquality.gov.au](mailto:niall.johnson@safetyandquality.gov.au)

Contributors: Niall Johnson, Paul Miles, Hayley Warren

***Consultation now open on the new National Safety and Quality Medical Imaging Standards***  
<https://www.safetyandquality.gov.au/NSQMI-Standards>

The Australian Commission on Safety and Quality in Health Care has, for the first time, developed *National Safety and Quality Medical Imaging (NSQMI) Standards*. These standards will replace the existing *Diagnostic Imaging Accreditation Scheme Standards*.

Medical imaging is a crucial tool applied by various clinical disciplines for an expanding number of healthcare services.

The NSQMI Standards aim to protect patients from harm and improve the safety and quality of health care by outlining a nationally consistent framework for delivering medical imaging services. The Standards set out the level of care patients expect.

These Standards were informed by a literature review, other national and international standards and expert advice from imaging practitioners, professional and industry groups.

Public consultation on the Standards is now open. To share your feedback, complete a survey, interview or provide a written submission, visit <https://www.safetyandquality.gov.au/NSQMI-Standards> The consultation is open until **27 September 2024**.

## Reports

*AI Implementation in Hospitals: Legislation, Policy, Guidelines and Principles, and Evidence about Quality and Safety. Literature Review and Environmental Scan Report*

Australian Institute of Health Innovation, Macquarie University and Australian Centre for Health Engagement, Evidence and Value, University of Wollongong  
 Sydney: Australian Commission on Safety and Quality in Health Care; 2024. p. 193.

URL	<a href="https://www.safetyandquality.gov.au/publications-and-resources/resource-library/ai-implementation-hospitals-legislation-policy-guidelines-and-principles-and-evidence-about-quality-and-safety">https://www.safetyandquality.gov.au/publications-and-resources/resource-library/ai-implementation-hospitals-legislation-policy-guidelines-and-principles-and-evidence-about-quality-and-safety</a>
Notes	The Australian Commission on Safety and Quality in Health Care engaged Macquarie University and the University of Wollongong to undertake a literature review and environmental scan to identify principles that enable the safe and responsible implementation of artificial intelligence (AI) in healthcare. It presents evidence from the contemporary published literature about AI implemented in acute care as well as current, published legislation, policies, guidelines, and principles for AI implementation in healthcare.

*The reality of, and potential for, digitally enabled care in the community*

Mistry P

London: The King's Fund; 2024.

URL	<a href="https://www.kingsfund.org.uk/insight-and-analysis/long-reads/reality-potential-digitally-enabled-care-community">https://www.kingsfund.org.uk/insight-and-analysis/long-reads/reality-potential-digitally-enabled-care-community</a>
Notes	This 'long read' piece from The King's Fund in the UK examines how primary or community services use digital technology and what the future could – and should – hold.

*Simulation To Improve Patient Safety: Getting Started. Issue Brief*

Deutsch ES, Bajaj K

Rockville, MD: Agency for Healthcare Research and Quality; 2024. P. 16.

URL	<a href="https://www.ahrq.gov/sites/default/files/wysiwyg/patient-safety/resources/simulation/simulation-issue-brief.pdf">https://www.ahrq.gov/sites/default/files/wysiwyg/patient-safety/resources/simulation/simulation-issue-brief.pdf</a>
Notes	The Agency for Healthcare Research and Quality (AHRQ) in the USA has published this Issue Brief that describes how simulation can be a valuable asset, how to use simulation resources to improve patient safety and how to collaborate with simulationists.

## Journal articles

*Preventing falls and fall-related injuries in older people*

Cameron ID, Kurrle SE, Sherrington C

Medical Journal of Australia 2024;221:140-4.

DOI	<a href="https://doi.org/10.5694/mja2.52374">https://doi.org/10.5694/mja2.52374</a>
Notes	This piece in the <i>Medical Journal of Australia</i> notes the <i>World guidelines for falls prevention and management for older adults: a global initiative</i> ( <a href="https://doi.org/10.1093/ageing/afac205">https://doi.org/10.1093/ageing/afac205</a> ) – that were noted in a previous issue of <i>On the Radar</i> . This piece then focuses on effective interventions and assessment to prevent falls in older people.

*None of Them Know Me': A Qualitative Study of the Implications of Locum Doctor Working for Patient Experience*

Ferguson J, Stringer G, Walshe K, Donnelly A, Grigoroglou C, Allen T, et al.

Health Expectations 2024;27:e14156.

DOI	<a href="https://doi.org/10.1111/hex.14156">https://doi.org/10.1111/hex.14156</a>
Notes	A recent issue of <i>On the Radar</i> (Issue 646) included a couple of pieces on locum doctors and the possible safety and quality implications. This accompanying piece looks at the issue from the patient experience perspective. From the analyses of interviews 'with 130 participants including locums, people working with locums and patients with experience of being seen or treated by locums' a number of themes were identified. These included: <ol style="list-style-type: none"><li>1) 'Awareness and disclosure; patients were not always aware if their doctor was a locum, and there was some debate about whether patients had a right to know, particularly if locum working presented quality and safety risks.</li><li>2) Continuity and accessibility of care; access was regarded as priority for acute conditions, but for long-term or serious conditions, patients preferred to see a permanent doctor who knew their history, although it was acknowledged that locums could provide fresh perspectives.</li><li>3) Communication and practice; locums and patients described how consultations were approached differently when doctors worked as locums. Patients evaluated their interactions based on how safe they felt with practitioners.'</li></ol>

*Associations between negative patient safety climate and infection prevention practices*

Johnson CT, Hessels AJ

American Journal of Infection Control. 2024.

DOI	<a href="https://doi.org/10.1016/j.ajic.2024.06.010">https://doi.org/10.1016/j.ajic.2024.06.010</a>
Notes	Paper from a US study that used data from 43 medical-surgical units from 13 hospitals across 6 US states to examine the relationship between negative perceptions of safety climate, health worker behaviour and infection control. The authors report that negative nurse perceptions of patient safety climate are associated with poor adherence to best practices such as standard precautions. They suggest that this demonstrates a 'need for targeted interventions to improve safety climate.'

For information on the Commission's work on infection prevention and control see

## COVID-19 resources

<https://www.safetyandquality.gov.au/covid-19>

The Australian Commission on Safety and Quality in Health Care has developed a number of resources to assist healthcare organisations, facilities and clinicians. These and other material on COVID-19 are available at <https://www.safetyandquality.gov.au/covid-19>

These resources include:

- **Poster – Combined contact and droplet precautions**  
<https://www.safetyandquality.gov.au/publications-and-resources/resource-library/infection-prevention-and-control-poster-combined-contact-and-droplet-precautions>

**STOP VISITOR RESTRICTIONS MAY BE IN PLACE**

**For all staff**  
**Combined contact & droplet precautions\***  
**in addition to standard precautions**

**Before entering room/care zone**

- 1 Perform hand hygiene
- 2 Put on gown
- 3 Put on surgical mask
- 4 Put on protective eyewear
- 5 Wear gloves, in accordance with standard precautions

**At doorway prior to leaving room/care zone**

- 1 Remove and dispose of gloves if worn
- 2 Perform hand hygiene
- 3 Remove and dispose of gown
- 4 Perform hand hygiene
- 5 Remove protective eyewear
- 6 Perform hand hygiene
- 7 Remove and dispose of mask
- 8 Leave the room/care zone
- 9 Perform hand hygiene

**What else can you do to stop the spread of infections?**

- Always change gloves and perform hand hygiene between different care activities and when gloves become soiled to prevent cross contamination of body sites
- Consider patient placement
- Minimise patient movement

\*e.g. Acute respiratory tract infection with unknown aetiology, seasonal influenza and respiratory syncytial virus (RSV)  
For more detail, refer to the Australian Guidelines for the Prevention and Control of Infection in Healthcare and your state and territory guidance.

AUSTRALIAN COMMISSION  
ON SAFETY AND QUALITY IN HEALTH CARE

PPE use images reproduced with permission of the NSW Clinical Excellence Commission.

- *Poster – Combined airborne and contact precautions*  
<https://www.safetyandquality.gov.au/publications-and-resources/resource-library/infection-prevention-and-control-poster-combined-airborne-and-contact-precautions>

## VISITOR RESTRICTIONS MAY BE IN PLACE

For all staff

# Combined airborne & contact precautions

In addition to standard precautions

**Before entering room/care zone**

- 1** Perform hand hygiene
- 2** Put on gown
- 3** Put on a particulate respirator (e.g. P2/N95) and perform fit check
- 4** Put on protective eyewear
- 5** Wear gloves in accordance with standard precautions

**At doorway prior to leaving room/care zone**

- 1** Remove and dispose of gloves if worn
- 2** Perform hand hygiene
- 3** Remove and dispose of gown
- 4** Leave the room/care zone
- 5** Perform hand hygiene (In an anteroom/outside the room/care zone)
- 6** Remove protective eyewear (In an anteroom/outside the room/care zone)
- 7** Perform hand hygiene (In an anteroom/outside the room/care zone)
- 8** Remove and dispose of particulate respirator (In an anteroom/outside the room/care zone)
- 9** Perform hand hygiene

**What else can you do to stop the spread of infections?**

- Always change gloves and perform hand hygiene between different care activities and when gloves become soiled to prevent cross contamination of body sites
- Consider patient placement
- Minimise patient movement

KEEP DOOR CLOSED AT ALL TIMES

- *Environmental Cleaning and Infection Prevention and Control*  
[www.safetyandquality.gov.au/environmental-cleaning](http://www.safetyandquality.gov.au/environmental-cleaning)
- *COVID-19 infection prevention and control risk management – Guidance*  
<https://www.safetyandquality.gov.au/publications-and-resources/resource-library/covid-19-infection-prevention-and-control-risk-management-guidance>
- *Safe care for people with cognitive impairment during COVID-19*  
<https://www.safetyandquality.gov.au/our-work/cognitive-impairment/cognitive-impairment-and-covid-19>
- *Stop COVID-19: Break the chain of infection* poster  
<https://www.safetyandquality.gov.au/publications-and-resources/resource-library/break-chain-infection-poster-a3>

- *COVID-19 and face masks – Information for consumers*

**AUSTRALIAN COMMISSION  
ON SAFETY AND QUALITY IN HEALTH CARE**

**INFORMATION  
for consumers**

## COVID-19 and face masks

### Should I use a face mask?

Wearing face masks may protect you from droplets (small drops) when a person with COVID-19 coughs, speaks or sneezes, and you are less than 1.5 metres away from them. Wearing a mask will also help protect others if you are infected with the virus, but do not have symptoms of infection.

Wearing a face mask in Australia is recommended by health experts in areas where community transmission of COVID-19 is high, whenever physical distancing is not possible. Deciding whether to wear a face mask is your personal choice. Some people may feel more comfortable wearing a face mask in the community.

When thinking about whether wearing a face mask is right for you, consider the following:

- Face masks may protect you when it is not possible to maintain the 1.5 metre physical distance from other people e.g. on a crowded bus or train
- Are you older or do you have other medical conditions like heart disease, diabetes or respiratory illness? People in these groups may get more severe illness if they are infected with COVID-19
- Wearing a face mask will reduce the spread of droplets from your coughs and sneezes to others (however, if you have any cold or flu-like symptoms you should stay home)
- A face mask will not provide you with complete protection from COVID-19. You should also do all of the other things listed below to prevent the spread of COVID-19.

### What can you do to prevent the spread of COVID-19?

Stopping the spread of COVID-19 is everyone's responsibility. The most important things that you can do to protect yourself and others are to:

- Stay at home when you are unwell, with even mild respiratory symptoms
- Regularly wash your hands with soap and water or use an alcohol-based hand rub
- Do not touch your face
- Do not touch surfaces that may be contaminated with the virus
- Stay at least 1.5 metres away from other people (physical distancing)
- Cover your mouth when you cough by coughing into your elbow, or into a tissue. Throw the tissue away immediately.
