# AUSTRALIAN COMMISSION ON SAFETY AND QUALITY IN HEALTH CARE

### On the Radar

Issue 679 16 December 2024

On the Radar is a summary of some of the recent publications in the areas of safety and quality in health care. Inclusion in this document is not an endorsement or recommendation of any publication or provider. Access to particular documents may depend on whether they are Open Access or not, and/or your individual or institutional access to subscription sites/services. Material that may require subscription is included as it is considered relevant.

On the Radar is available online, via email or as a PDF or Word document from <a href="https://www.safetyandquality.gov.au/newsroom/subscribe-news/radar">https://www.safetyandquality.gov.au/newsroom/subscribe-news/radar</a>

If you would like to receive *On the Radar* via email, you can subscribe on our website <a href="https://www.safetyandquality.gov.au/newsroom/subscribe-news">https://www.safetyandquality.gov.au/newsroom/subscribe-news</a> or by emailing us at <a href="mail@safetyandquality.gov.au">mail@safetyandquality.gov.au</a>. You can also send feedback and comments to <a href="mail@safetyandquality.gov.au">mail@safetyandquality.gov.au</a>.

#### On the Radar

Editor: Dr Niall Johnson, Amy Forsyth, Paul Miles

National Medicines Symposium 2024 https://www.safetyandquality.gov.au/NMS24

Watch the highlights from NMS 2024

The National Medicines Symposium 2024 session recordings are now available. Whether you missed a session or want to revisit the insightful discussions, you can now explore the key highlights from the event.

Panel highlights to explore:

- Managing Medicines for an Ageing Population Hear from Professor Jennifer Martin, Professor Libby Roughead and Mr Steve Waller on challenges of medication safety in an ageing population such as polypharmacy and multimorbidity and opportunities for improvement.
- **Deprescribing in Practice** Join Professor Sarah Hilmer AM, Dr Lisa Kouladjian O'Donnell and Professor Jenny May AM as they explore practical approaches to safely deprescribe medications when the risks outweigh the benefits, ensuring patient safety.
- Digital Tools for Safe Medication Use Gain insights from Professor Melissa Baysari, Mr Michael Bakker, Ms Kate Oliver and Ms Alice Nugent on how innovative digital tools can be leveraged to enhance medication management.

Connect. Care. Confidence Summit on Clinical Governance in Digital Health <a href="https://www.digitalhealth.gov.au/c3point0">https://www.digitalhealth.gov.au/c3point0</a>

<u>Register now</u> for the second <u>Connect. Care. Confidence. 2025</u> Summit on Clinical Governance in Digital Health, featuring insights from senior leaders in digital health.

Streaming live on 18 February 2025 (10.00am to 4.00pm AEDT), the event follows the success of the first summit in 2023, co-hosted by the Australian Digital Health Agency and the Australian Commission on Safety and Quality in Health Care.

This interactive event is designed as an immersive experience with a range of sessions. You will be able to join plenary sessions as well as choose from concurrent streams, grouped according to the three 'Cs' of Connect, Care, and Confidence.

Register here and secure your place with leading innovators, service providers, software vendors, expert clinicians and consumers for a day of panel discussions, case studies and Q&A sessions with local and international presenters.

For more information on the Summit visit the Connect. Care. Confidence. 2025 webpage.

### **Books**

Supply Chain Management. Elements of Improving Quality and Safety in Healthcare Williams SJ

Cambridge: Cambridge University Press; 2024.

DOI	https://doi.org/10.1017/9781009325271
Notes	This is the latest release in the Elements of Improving Quality and Safety in Healthcare series from The Healthcare Improvement Studies Institute (the THIS Institute) in Cambridge. This volume examines the key principles and definitions of healthcare supply chains. Practical insights into the design and operation of healthcare supply chains are also provided. Core characteristics of effective supply chain management such as performance management, systems thinking, and supply chain integration are examined along with the application of specific supply chain design and improvement approaches.

### Reports

Medication not given: administration of time critical medication in the emergency department

Investigation report

Health Services Safety Investigation Body

Poole: HSSIB; 2024.

URL	https://www.hssib.org.uk/patient-safety-investigations/medication-related-harm/investigation-report/
Notes	This latest report from the Health Services Safety Investigation Body (HSSIB) looks at a particular form of medication error in a particular context: missed medications in the emergency department (ED). This investigation was prompted by the case of an 85 year old patient who did not receive time-critical medication for Parkinson's disease while attending an ED for three days. The patient should have received 18 doses of the medication, but 7 doses were missed and 3 doses were given late. The patient died four weeks after admission to a medical ward. The investigation report includes findings along with observations and consideration of the role played by electronic prescribing and medicines administration systems in supporting care in this area.

For information on the Commission's work on medication safety see <a href="https://www.safetyandquality.gov.au/our-work/medication-safety">https://www.safetyandquality.gov.au/our-work/medication-safety</a>

### Journal articles

Safety of inpatient care in surgical settings: cohort study

Duclos A, Frits ML, Iannaccone C, Lipsitz SR, Cooper Z, Weissman JS, et al BMJ. 2024;387:e080480.

DOI	https://doi.org/10.1136/bmj-2024-080480
Notes	This paper in the <i>British Medical Journal</i> (BMJ) reports on a multi-centre retrospective cohort study conducted across 11 hospitals the USA that sought to examine adverse events associated with perioperative care. The study included '1009 patients from a randomly selected sample of 64 121 adults admitted for surgery during 2018.' Among the results reported:

• 'Among 1009 patients reviewed, <b>adverse events</b> were identified in <b>38.0</b> % (95% confidence interval 32.6 to 43.4), with <b>major adverse events</b> occurring in <b>15.9</b> % (12.7 to 19.0).
• Of 593 identified adverse events, 353 (59.5%) were potentially preventable and 123 (20.7%) were definitely or probably preventable.
• The most common adverse events were related to <b>surgical procedures</b> (n=292, 49.3%), followed by <b>adverse drug events</b> (n=158, 26.6%),
healthcare associated infections (n=74, 12.4%), patient care events (n=66,
11.2%), and blood transfusion reactions ( $n=3, 0.5\%$ ).

Virtual care: supporting acute care service delivery in rural and remote communities Medical Journal of Australia, Volume 221, Issue 11 Supplement

alcai Jouri	chear Journal of Australia, Volume 221, 1880e 11 Supplement	
URL	https://www.mja.com.au/journal/2024/221/11/supplement	
	This supplement to the Medical Journal of Australia is focused on Virtual care:	
	supporting acute care service delivery in rural and remote communities. This	
	supplement includes the following (open access) articles:	
Notes	<ul> <li>The Virtual Rural Generalist Service: a hybrid virtual model of care designed to improve health access and outcomes in rural and remote communities</li> </ul>	
	<ul> <li>Health service access and quality of care provided by the Western NSW Local Health District Virtual Rural Generalist Service: a retrospective analysis of linked administrative data</li> </ul>	
	<ul> <li>Clinician experiences of a hybrid virtual medical service supporting rural and remote hospitals: a qualitative study</li> </ul>	
	<ul> <li>Patient and carer experiences of hospital-based hybrid virtual medical care: a qualitative study</li> </ul>	
	<ul> <li>An economic evaluation of the Virtual Rural Generalist Service versus usual care in Western NSW Local Health District</li> </ul>	
	<ul> <li>Barriers, facilitators and next steps for sustaining and scaling virtual hospital services in Australia: a qualitative descriptive study</li> </ul>	
	Defining a core set of research and development priorities for virtual care in	
	the post-pandemic environment: a call to action.	

### Health Policy

Volume 151, January 2025

	,
URL	https://www.sciencedirect.com/journal/health-policy/vol/151/
	A new issue of <i>Health Policy</i> has been published. Articles in this issue of <i>Health Policy</i> include:
Notes	<ul> <li>Using outcome measures in sub-national level performance management: When and under what circumstances? (Pushkar Silwal, Tim Tenbensel, Daniel Exeter, Arier Lee)</li> <li>NHS action on social and economic development in England: Vague national policy expectations (Phoebe Dunn, Lucinda Allen, Luisa Buzelli, Leo Ewbank, Hugh Alderwick)</li> <li>Implementation of socio-economic variables in risk adjustment systems: A quantitative analysis using the example of Germany (Gerald Lux, Theresa Hüer, Florian Buchner, Jürgen Wasem)</li> <li>Predictors of Croatian nurses' turnover intention: A cross-sectional study (Ivana Gusar, Dragan Šijan, Tomislav Sorić, Sonja Šare, Marija Ljubičić)</li> </ul>

- Please mind the gap between **guidelines & behavior change**: A systematic review and a consideration on effectiveness in healthcare (Stefano Gandolfi, Nicola Bellè, Sabina Nuti)
- The **influenza vaccination's impact** elderly's health outcomes in Catalonia (Spain) (Toni Mora, Montserrat Martínez-Marcos, Carmen Cabezas-Peña)
- Physical activity policy implementation and physical activity levels in the European Union: Are we on track to close the gap between policy and practice? (Stephen Whiting, Karim Abu-Omar, Peter Gelius, João Firmino-Machado, ... Romeu Mendes)
- Urban–rural disparities in **hospital admissions for depression** in Austria: A spatial panel data analysis (Michael Berger, Martin Zuba, Judit Simon)
- Primary prevention in hospitals in 20 high-income countries in Europe A case of not "Making Every Contact Count"? (Bernd Rechel, Béatrice Durvy, Gonçalo Figueiredo Augusto, Isabelle Aujoulat, ... Madelon Kroneman)
- Mental health of Australian frontline nurses during the COVID-19 pandemic: Results of a large national survey (Akbar Zamanzadeh, Marion Eckert, Nadia Corsini, Pam Adelson, Greg Sharplin)
- How COVID-19 illness perceptions and individual shocks are associated with **trust during the COVID-19 pandemic** in Australia, France, Germany, and South Africa (Marie-Hélène Broihanne, Daria Plotkina, Stefanie Kleimeier, Anja S. Göritz, Arvid O I Hoffmann)

JBI Evidence Synthesis

Volume 22, Issue 12, December 2024

URL	https://journals.lww.com/jbisrir/toc/2024/12000
	A new issue of JBI Evidence Synthesis has been published. Articles in this issue of JBI
	Evidence Synthesis include:
	• Editorial: Bringing <b>artificial intelligence</b> safely to the clinics: hope is not a strategy (Eline Sandvig Andersen)
	<ul> <li>Monitoring performance of clinical artificial intelligence in health care: a scoping review (Eline Sandvig Andersen, Johan Baden Birk-Korch, Rasmus Søgaard Hansen, Line Haugaard Fly, Richard Röttger, Diana Maria Cespedes Arcani, Claus Lohman Brasen, Ivan Brandslund, Jonna Skov Madsen)</li> </ul>
	• Experiences of adult patients living with <b>depression-related insomnia</b> : a qualitative systematic review (Sanne T Kristiansen, Cecilie N Lyhne, Mette Kragh, Karen R Sigaard, Poul Videbech, Erik R Larsen, Merete B Bjerrum)
Notes	<ul> <li>Characteristics of natural environment use by occupational therapists working in mental health care: a scoping review (Ruth Bishop, Frazer Underwood, Fiona Fraser, Lisa Burrows, Jill Shawe)</li> </ul>
	Artificial intelligence applied in human health technology assessment: a scoping review protocol (Denis Satoshi Komoda, Marilia Mastrocolla de
	Almeida Cardoso, Brígida Dias Fernandes, Marília Berlofa Visacri, Carlos Roberto Silveira Correa)
	• Effectiveness of receiving cardiovascular disease genetic risk information on health behaviors, psychological responses, and associated risk factor modification in individuals: a systematic review protocol (Ruofei (Trophy)
	Chen, Vincent Pearson, Orathai Suebkinorn, Lemma N. Bulto, Alice Anderson, Adam J Nelson, Sophia Zoungas, Stephen J Nicholls, R A Clark)

- Experiences of siblings of children with **profound intellectual and multiple disabilities**: a qualitative systematic review protocol (Yuta Koto, Masami Tanaka, Shingo Ueki, Kazuteru Niinomi)
- **Deprescribing** for older adults during acute care admission: a scoping review protocol (Erika Sprake, Janice Kung, Michelle Graham, R Tsuyuki, W Gibson)
- Methods to incorporate patient preferences into medical decision algorithms and models, and their quantification, balancing, and evaluation: a scoping review protocol (Jakub Fusiak, U Mansmann, Verena S Hoffmann)
- Return on investment of tobacco control measures: a systematic review protocol (Paramita Bhattacharya, Sajda Khatoon, Suraya Roy, Nirmalya Mukherjee, Amit Yadav, Pranay Lal, Subhash Pokhrel, Denny John)
- Experiences of **breastfeeding among mothers of preterm infants** during their infants' hospital stay: a qualitative systematic review protocol (Tippawan Srichalerm, Donruedee Kamkhoad, Ratchanok Phonyiam)
- Education and training programs for **health professionals' competence in virtual consultations**: a scoping review protocol (Louise M W Mathiesen, Bettan Bagger, D Høgsgaard, M V Nielsen, S S Gjedsig, M-B Hägi-Pedersen)
- Strategies to increase accessibility for students with disabilities in health professional programs: a scoping review protocol (Shaminder Dhillon, Michelle Ira Roque, Dina Brooks, Sarah Wojkowski)
- Experiences of empathy of caregivers caring for persons with **dementia**: a qualitative systematic review protocol (Meiling Han, Hunsa Sethabouppha, Nonglak Chaloumsuk, Patraporn Bhatarasakoon)
- Strategies used to deliver bad news to the family of unexpected and sudden death victims: a scoping review protocol (Hélène Ferreira Malta, Rui Carlos Negrão Baptista, Maria Aurora Gonçalves Pereira, Paulo Gonçalves Parente, Mónica Alexandra Pinho da Silva, Eduardo Santos)
- Consumer experience and outcomes related to **short and midline peripheral intravenous catheters** in acute health care (Paulo Santos-Costa)

### BMJ Quality & Safety online first articles

URL	https://qualitysafety.bmj.com/content/early/recent
	BMJ Quality & Safety has published a number of 'online first' articles, including:
Notes	<ul> <li>Editorial: Low-quality evidence on practices to prevent transmission of resistant organisms calls for rigorous trials and a paradigm shift (Barbara Trautner, Marin L Schweizer)</li> <li>Editorial: Diagnostic delay: lessons learnt from marginalised voices (Farah Acher Kaiksow)</li> <li>Contextual factors that influence adoption and sustainment of self-management support in cancer survivorship care: a practical application of theory with qualitative interviews (Nickola Pallin, John Browne, Roisin Connolly, Josephine Hegarty, Sheena McHugh)</li> <li>Improving the maternity experience for Black, African, Caribbean and mixed-Black families in an integrated care system: a multigroup community and interprofessional co-production prioritisation exercise using nominal group technique (Sarindi Aryasinghe, Phoebe Averill, Carole Waithe, Susan Ibuanokpe, Rhianna Newby-Mayers, Nawal Lakhdar, Moussa Amine Sylla, Elizabeth Cox, Sabrina Das, Erik Mayer)</li> </ul>

International Journal for Quality in Health Care online first articles

URL	https://academic.oup.com/intqhc/advance-articles
	International Journal for Quality in Health Care has published a number of 'online first'
	articles, including:
Notes	• The maturity of <b>lean management</b> in a large academic medical center in
	Finland: a qualitative study (Irmeli Hirvelä, Paulus Torkki, Mervi Javanainen,
	Elina Reponen)

#### Online resources

### Australian Living Evidence Collaboration

https://livingevidence.org.au/

### [USA] Effective Health Care Program reports

https://effectivehealthcare.ahrq.gov/

The US Agency for Healthcare Research and Quality (AHRQ) has an Effective Health Care (EHC) Program The EHC has released the following final reports and updates:

- Making Healthcare Safer IV: **Nursing Staff Shortages.** Research Protocol https://effectivehealthcare.ahrq.gov/products/nursing-staff-shortages/protocol
- Impact of Healthcare Worker Safety and Wellness: A Systematic Review. Research Protocol <a href="https://effectivehealthcare.ahrq.gov/products/worker-safety-wellness/protocol">https://effectivehealthcare.ahrq.gov/products/worker-safety-wellness/protocol</a>
- Diagnosis and Management of Obsessive Compulsive Disorders in Children <a href="https://effectivehealthcare.ahrq.gov/products/obsessive-compulsive-disorder/research">https://effectivehealthcare.ahrq.gov/products/obsessive-compulsive-disorder/research</a>

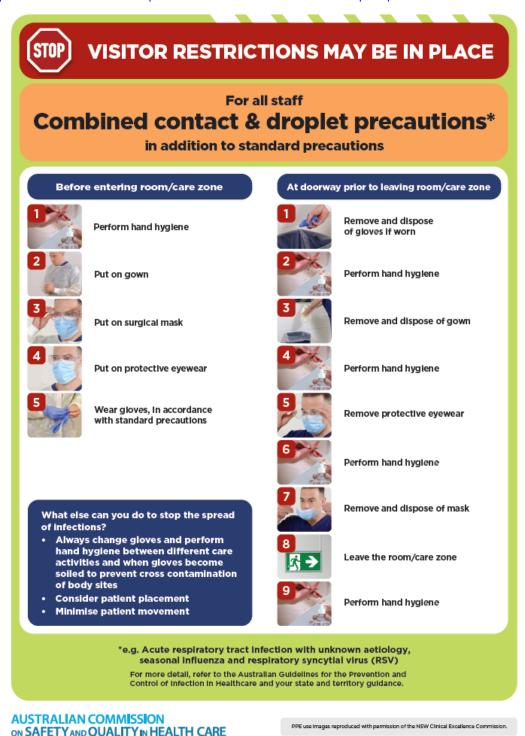

#### **COVID-19** resources

https://www.safetyandquality.gov.au/covid-19

The Australian Commission on Safety and Quality in Health Care has developed a number of resources to assist healthcare organisations, facilities and clinicians. These and other material on COVID-19 are available at <a href="https://www.safetyandquality.gov.au/covid-19">https://www.safetyandquality.gov.au/covid-19</a>

These resources include:

Poster – Combined contact and droplet precautions
 https://www.safetyandquality.gov.au/publications-and-resources/resource-library/infection-prevention-and-control-poster-combined-contact-and-droplet-precautions

• Poster – Combined airborne and contact precautions
<a href="https://www.safetyandquality.gov.au/publications-and-resources/resource-library/infection-prevention-and-control-poster-combined-airborne-and-contact-precautions">https://www.safetyandquality.gov.au/publications-and-resources/resource-library/infection-prevention-and-control-poster-combined-airborne-and-contact-precautions</a>

### **VISITOR RESTRICTIONS MAY BE IN PLACE**

For all staff

### Combined airborne & contact precautions

In addition to standard precautions

#### Before entering room/care zone

Perform hand hyglene

Put on gown

Put on a particulate respirator (e.g. P2/N95) and perform fit check

Put on protective eyewear

Wear gloves in accordance with standard precautions

### At doorway prior to leaving room/care zone

Remove and dispose of gloves if worn

Perform hand hygiene

Remove and dispose of gown

Leave the room/care zone

Perform hand hygiene (in an anteroom/outside the room/care zone)

Remove protective eyewear (In an anteroom/outside the room/care zone)

Perform hand hygiene (in an anteroom/outside the room/care zone)

Remove and dispose of particulate respirator (in an anteroom/outside the room/care zone)

Perform hand hyglene

### What else can you do to stop the spread of infections?

- Always change gloves and perform hand hygiene between different care activities and when gloves become soiled to prevent cross contamination of body sites
- · Consider patient placement
- · Minimise patient movement

### KEEP DOOR CLOSED AT ALL TIMES

# AUSTRALIAN COMMISSION ON SAFETY AND QUALITY IN HEALTH CARE

### COVID-19 and face masks

#### Should I use a face mask?

Wearing face masks may protect you from droplets (small drops) when a person with COVID-19 coughs, speaks or sneezes, and you are less than 1.5 metres away from them. Wearing a mask will also help protect others if you are infected with the virus, but do not have symptoms of infection.

Wearing a face mask in Australia is recommended by health experts in areas where community transmission of COVID-19 is high, whenever physical distancing is not possible. Deciding whether to wear a face mask is your personal choice. Some people may feel more comfortable wearing a face mask in the community.

When thinking about whether wearing a face mask is right for you, consider the following:

- Face masks may protect you when it is not possible to maintain the 1.5 metre physical distance from other people e.g. on a crowded bus or train
- Are you older or do you have other medical conditions like heart disease, diabetes or respiratory illness? People in these groups may get more severe illness if they are infected with COVID-19
- Wearing a face mask will reduce the spread of droplets from your coughs and sneezes to others (however, if you have any cold or flu-like symptoms you should stay home)
- A face mask will not provide you with complete protection from COVID-19. You should also do all of the other things listed below to prevent the spread of COVID-19.

## What can you do to prevent the spread of COVID-19?

Stopping the spread of COVID-19 is everyone's responsibility. The most important things that you can do to protect yourself and others are to:

- Stay at home when you are unwell, with even mild respiratory symptoms
- Regularly wash your hands with soap and water or use an alcohol-based hand rub
- Do not touch your face
- Do not touch surfaces that may be contaminated with the virus
- Stay at least 1.5 metres away from other people (physical distancing)
- Cover your mouth when you cough by coughing into your elbow, or into a tissue. Throw the tissue away immediately.
